

ACTIVTrak

TEAM BEHAVIOR ANALYTICS

“We need to be able to make sure employees stay focused. ActivTrak’s software assures there is no temptation to play on the internet. I don’t want people to be checking Facebook, their bank, etc. on my time. More disconcerting is the many Agents and staff who have found employees using company time to apply for other jobs. Why ActivTrack? Because other products interfered with computer performance. I need the functionality without the disruption.”

Laura Harris Allstate Agency Owner

ActivTrak is an effortless monitoring software that provides real-time insights into how workers spend their time online and on applications.

ActivTrak uses an invisible Tracking Agent to capture and store the real-time activity of its users.

Quickly and easily install the Agent yourself on all the devices you want to monitor — either on-site or remote — and within minutes, ActivTrak will automatically start capturing, storing and sending Screenshots directly to your ActivTrak account.

ActivTrak allows Administrators complete control over what your company wants to monitor, who they want to monitor and when.
